

**Reynolds Building (BLDG #26)
South Elevation Window Refurb
Work Plan
Project 504017**

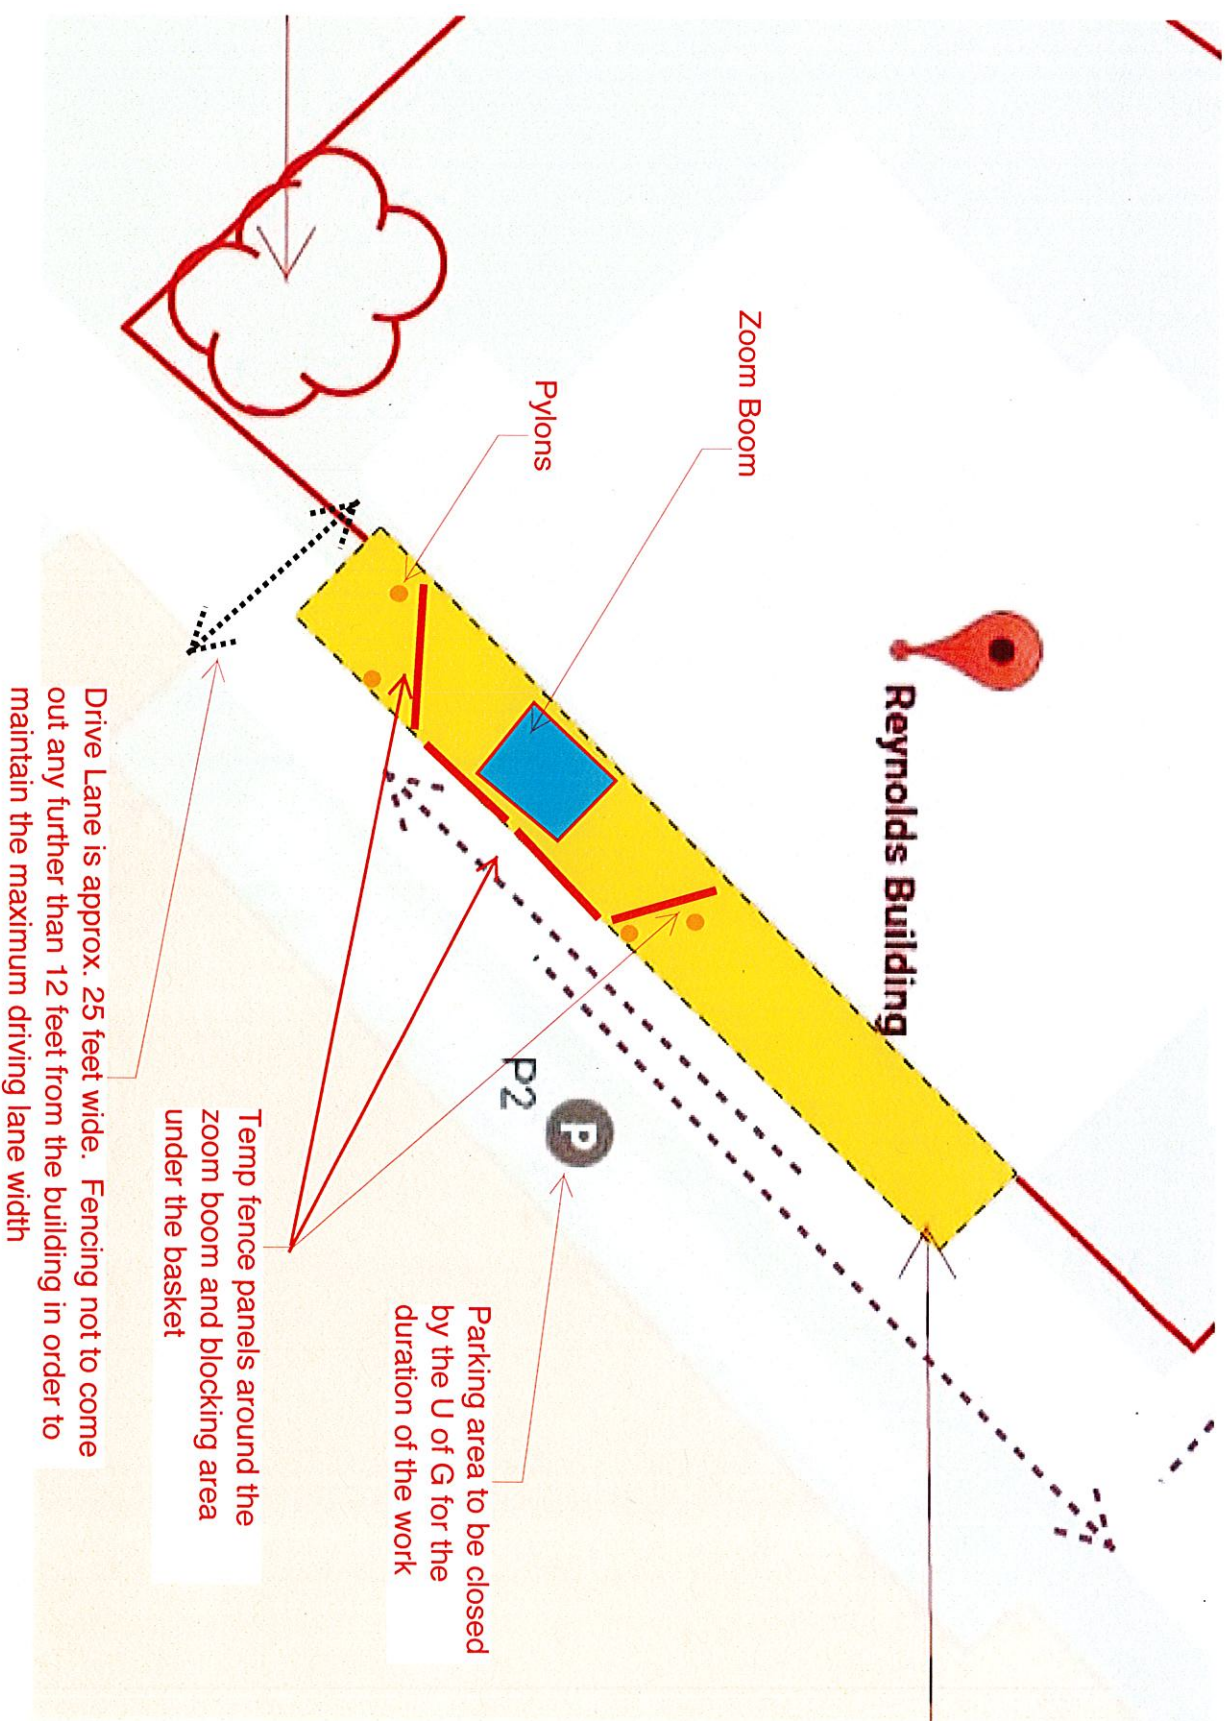

** See next page for detail of typical setup within the Work Area*

WORK PLAN

1. A zoom boom will be utilized inside of the Work Area to access the south face of the building for window refurbishment work.
2. Four to five sections of temporary "Fast Fence" will be set up to enclose the zoom boom within the Work Area. When not in use the fencing sections will be pushed as tight to the building as possible. Care to be taken to minimize the space taken up within the Work Area while maintaining safety precautions to the workers and the areas below.
3. Fence will come out from the building no more than 12 feet in order to maintain the maximum width driving lane possible.
4. Workers to wear high vis vests.
5. Orange pylons to be placed around the fence for better visibility to traffic in the area.
6. Danger Signs / Warning signs to be posted on the fence.
7. University will close down parking area shown on the drawing in order to maintain maximum allowable driving lane for Fire Route & delivery access.

Typical setup within the Work Area
